A Saturday Fix-It Event

[1] When Leo's desk lamp stopped working, he planned to buy a new one. His grandmother told him about a "Fix-It Saturday" event at the community center. People could bring broken things there, and volunteers would help them repair their items. Leo was not sure that they could fix his lamp, but he decided to try.

[2] At the event, a volunteer named Ms. Chen asked Leo what had happened. Leo explained that the lamp suddenly turned off while he was doing his homework. Before they opened the lamp, Ms. Chen showed him how to make sure it was safe. They found a loose wire inside. Ms. Chen did not repair it for him. Instead, she explained each step and let Leo connect the wire. After about forty minutes, the lamp worked again.

[3] While Leo was there, he saw people working on a toaster, a clock, and a toy train. The organizers put a green sticker on every item that was repaired and recorded the results. That day, visitors brought twenty-eight items, and nineteen of them were repaired. Leo learned that repairing old things could reduce waste. However, he was more surprised by how people of different ages talked and helped one another.

[4] The next month, Leo returned without a broken item. He wanted to help, but he did not know enough to repair machines alone. So, he made simple cards that showed visitors where to wait and where to return tools. He also told younger children what he had learned about safety. At the end of the day, Ms. Chen thanked him. Leo realized that the event was not only about fixing old things. It was also a place where people shared skills and became more confident.
