From	Daniel Kim <daniel@harborside-science.org>
To	Student Science Day participants
Date	September 18
Subject	Final information for Saturday's event

Dear participants,

Thank you for joining Student Science Day on Saturday, September 28. Because the community hall is being used for an emergency training exercise, the event will take place at Harborside High School instead. Please enter through the South Gate between 8:30 and 8:50 a.m. Volunteers in orange vests will guide you to the gym. The opening talk begins at 9:00, so do not go directly to a classroom.

Each team will receive one table and an electrical outlet. Bring your own extension cord if your display needs power, and send me a message by Wednesday if you require water. For safety reasons, experiments using open flames are not allowed. The school cafeteria will sell drinks, sandwiches, and fruit, but it accepts cash only. You may also bring your own lunch.

Presentations end at 2:30 p.m. After that, judges will visit the displays selected for the final round. Other teams may pack their materials, but everyone is welcome to attend the award ceremony at 3:30. If you need to leave before the ceremony, ask a volunteer to check your table area first. Certificates will be e-mailed to all participants next week.

Best regards,
Daniel Kim
Event Coordinator

5 Passage B｜本文

Small shops often have difficulty offering home delivery. A single store may receive only a few online orders each day, so hiring its own driver can cost more than the service earns. Customers, however, increasingly expect convenient delivery. In several towns, groups of independent shops are responding by sharing a small delivery center and a team of drivers.

Each shop sends its packages to the center by a fixed time. Workers organize them by neighborhood rather than by store, and one driver can deliver products from several businesses on the same trip. This reduces repeated journeys along the same streets. Shops pay according to the number and size of their packages, so even a business with only two daily orders can take part.

Cooperation creates challenges as well. Packages must have clear labels, and food may need to be kept at a safe temperature. If one shop sends an order late, it can delay deliveries from several others. Some groups solve this by using common labels and offering short training sessions. They also set a second, later delivery time for urgent orders, although this service costs more.

The shared center can provide useful information. By comparing delivery records, shop owners can learn which neighborhoods order particular products and which days are busiest. They may then adjust their stock or plan joint sales. Still, the system is not suitable everywhere. In areas where shops are far apart, collecting packages may create additional travel. Before starting, a group must decide whether the expected savings are large enough to justify that extra travel.

Key Vocabulary

independent	独立した	**delivery center**	配送拠点
organize	整理する	**urgent**	緊急の
adjust	調整する	**expected savings**	予想節約額

6 Passage B｜段落訳と構成

第 1 段落　小規模店が単独配送を行うと費用が高くなるため、複数店が配送拠点と運転手を共有する町があります。

第 2 段落　荷物を店別でなく地域別にまとめ、1 回で複数店の商品を届けます。荷物の数と大きさに応じた料金なので注文が少ない店も参加できます。

第 3 段落　表示、食品温度、遅延への対応が課題です。共通ラベル、研修、追加料金の緊急便などで対応します。

第 4 段落　配送記録は在庫や共同販売の計画にも役立ちます。ただし店舗間が遠い地域では集荷距離が増えるため、節約額との比較が必要です。

段落構成：①必要性　②設計方法　③課題　④既存建物の再利用と共通目標

2 ○	**It groups packages by neighborhood.** **正解。**
3 ×	It limits each driver to one business. 複数店を一度に運ぶ。
4 ×	It sends all packages on different days. 別日に分けるとはない。
